

3. Claim Objections - 35 USC § 112

Claims 5-9 as amended are believed to include essential structural cooperative relationships of elements as per MPEP § 2172.01.

The specific method of generating complex orthogonal codes for use in CDMA communications is believed to be set forth in a clear, sequential, and logical manner such that one skilled in the art is able to determine, definitely, the relationship between the steps.

4. Claim Objections - 35 USC § 112

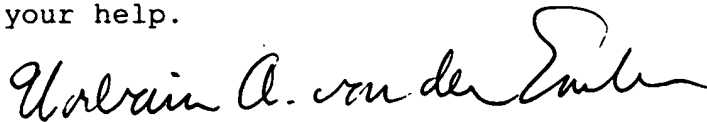

Under the guidance of the examiner it is believed that the structure which goes to make up the device has been clearly and positively specified and has been organized and correlated in such a manner as to present a complete operative device with the claims in one sentence format.

5. Conclusions

I believe that with the guidance and help of the examiner the claims have been amended to meet the 35 USC 112 and MPEP 2172.01 requirements.

Thanks ever for your help.

Sincerely,
